Quarterly Report to Congress on FHA Single-Family Mutual Mortgage Insurance Fund Programs

FY 2024 Q1 Data as of December 31, 2023

U.S. Department of Housing and Urban Development Federal Housing Administration

FOREWORD

On behalf of Secretary Marcia L. Fudge and Assistant Secretary for Housing Julia R. Gordon, and pursuant to requirements of Section 202(a)(5) of the National Housing Act as amended by the FHA Modernization Act of 2008 (Public Law 110-289, Page 122 Stat. 2834), I am herewith transmitting the Fiscal Year (FY) 2024 First Quarter Report. This report covers mortgages that are obligations of the Mutual Mortgage Insurance (MMI) Fund of the Federal Housing Administration (FHA) for the reporting period covering October 1, 2023, through December 31, 2023.

In the first quarter of FY 2024, FHA served 118,915 first-time homebuyers, representing 82 percent of FHA's forward purchase mortgage endorsements. FHA also served 44,515 households of color with purchase mortgages and 7,105 seniors were able to access their home equity using FHA's Home Equity Conversion Mortgage Program (HECM). For those homeowners who fell behind on their mortgage payments since the start of the pandemic, FHA continued to deliver expanded flexibilities and forbearance options. The agency continues to engage with mortgage servicers, consumer advocates, and housing counselors to assist in ensuring that homeowners in need are aware of the loss mitigation tools available to them.

Despite a number of FHA borrowers continuing to face financial hardships in the first quarter of FY 2024, the percentage of seriously delinquent mortgages (those past due 90 or more days) have declined to the pre-pandemic levels, with the serious delinquency rate declining from 11.89 percent at the end of the same quarter of FY 2021 to 4.04 percent at the end of this quarter. In addition, early payment defaults (defaults within six months of endorsement) declined from a peak of nearly nine percent in early 2020 to 1.66 percent in the current quarter, though still above pre-pandemic levels. FHA will continue to focus extensive efforts on helping struggling homeowners to obtain financial relief needed to achieve long-term homeownership sustainability.

This quarterly report also provides detailed information on the composition and credit quality of new insurance in force, and on FHA's financial position as of 12/31/2023. In addition to this report to Congress, FHA provides information regarding the status of its Single-Family mortgage insurance portfolio via the publication of other complementary reports, including HUD's FY 2023 Annual Report to Congress on the Financial Status of the Mutual Mortgage Insurance Fund and the annual independent actuarial review of the MMI Fund, both published on November 15, 2023. All FHA reports can be found in the Office of Housing Reading Room.

The Department is pleased to provide details to members of Congress on how this report was prepared or to answer any questions about the information presented.

Sincerely,

Mia N. Pittman

Deputy Assistant Secretary Office of Risk Management and Regulatory Affairs

Mia N. Pittman

This report is in fulfillment of the requirement under section 2118 of the Housing and Economic Recovery Act of 2008 (12 USC 1708(a)(5)) that HUD report to the Congress on a quarterly basis respecting mortgages that are an obligation of the Mutual Mortgage Insurance Fund.

Endorsement Activity

During the first quarter of FY 2024, FHA endorsed 182,978 forward mortgages for insurance, a decrease of 13.97 percent from the prior quarter (Figure 1a). This change was largely due to seasonality and higher mortgage rates. The dollar volume of purchase endorsements decreased by 14.49 percent or \$7.59 billion from the previous quarter, while refinance endorsement dollar volume of \$8.71 billion this quarter was down by \$1.70 billion or 16.31 percent from the prior quarter. The dollar volume of all forward mortgage endorsements of \$53.48 billion decreased 14.79 percent from the prior quarter (Exhibit A-2).

FHA's purchase loan count was down by 14.10 percent from the previous quarter, from 168,864 to 145,058. Meanwhile, the FHA-to-FHA refinance endorsement count decreased by 14.96 percent, from 18,667 to 15,875. Conventional to FHA refinance endorsement count also decreased 12.42 percent, from 25,170 to 22,045. Cash out refinance endorsements, (limited to 80 percent loan to value) made up 94.08 percent of all refinance endorsements for this quarter, up from 61.46 percent in FY 2022 and 19.40 percent in FY 2021, but comparable to 93.86 percent in FY 2023.

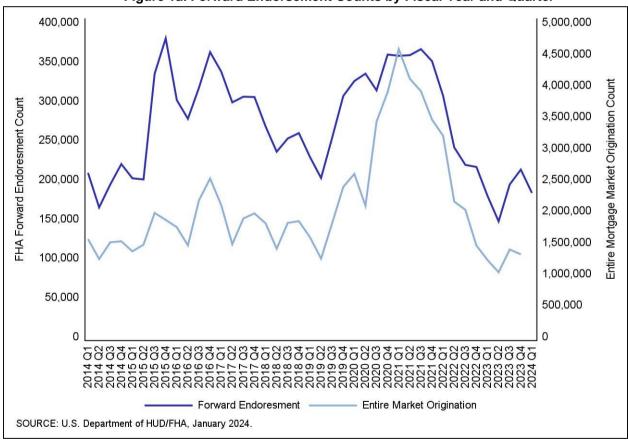

Figure 1a. Forward Endorsement Counts by Fiscal Year and Quarter

HECM endorsement volume was \$3.48 billion for the first quarter of FY 2024, a decrease of 14.53 percent from the previous quarter. The HECM endorsement count was 7,105 this quarter, a decrease of 15.39 percent from the prior quarter. Figure 1b shows HECM endorsements relative to the Federal Housing Finance Agency (FHFA) Housing Price Index (HPI). In addition, the HECM refinance endorsement count declined from over 50 percent of all HECM endorsements in the first quarter of FY 2022 to 7 percent this quarter.

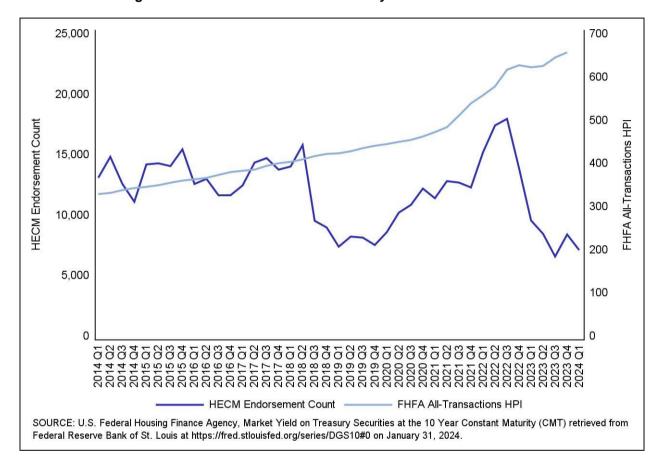

Figure 1b. HECM Endorsement Counts by Fiscal Year and Quarter

FHA Loan Credit Characteristics

Average credit score for forward engagements (excluding streamline refinances) increased to 675 this quarter from 674 in the prior quarter, maintaining the upward trend since the fourth quarter of FY 2022. (Figure 2 and Exhibit A-4).

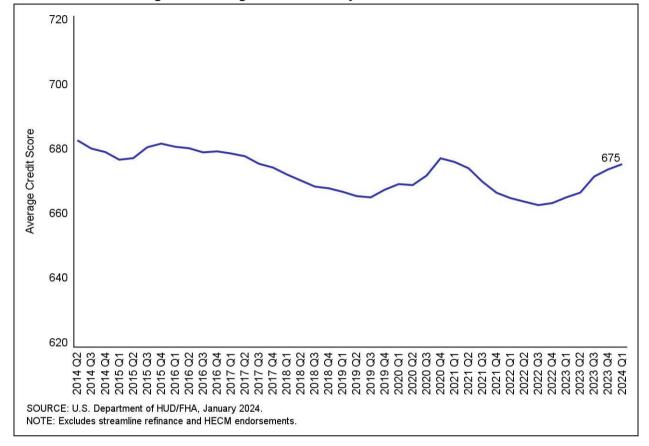

Figure 2. Average Credit Score by Fiscal Year and Quarter

As shown in Figure 3a, the distribution of credit scores for FHA forward endorsements has gradually shifted over the past few years. However, the core of the distribution continued to be in the 640–679 range (33.05 percent). In the first quarter of FY 2024, the share of 720+credit scores increased by 2.03 percentage points from the prior quarter to 19.75 percent (Figure 3a and Exhibit A-3).

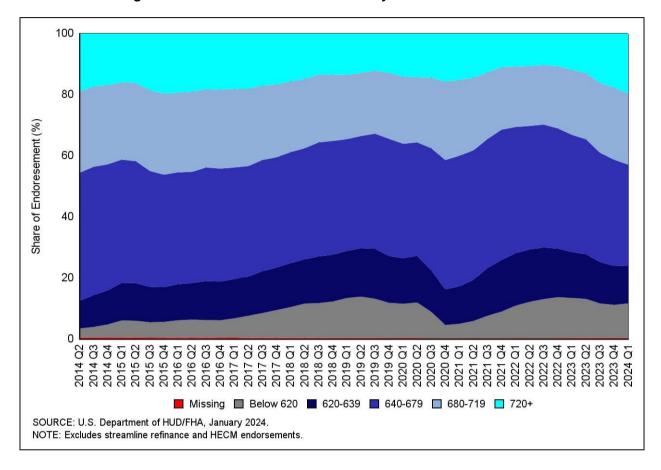

Figure 3a. Distribution of Credit Scores by Fiscal Year and Quarter

Figure 3b shows another perspective of the shift in FHA's credit profile, with loans endorsed with 720+ credit scores increasing to 19.75 percent in the first quarter of FY 2024 from 17.72 percent in the prior quarter. Loans endorsed with less than 620 credit scores rose from 10.94 percent in the prior quarter to 11.38 percent this quarter.

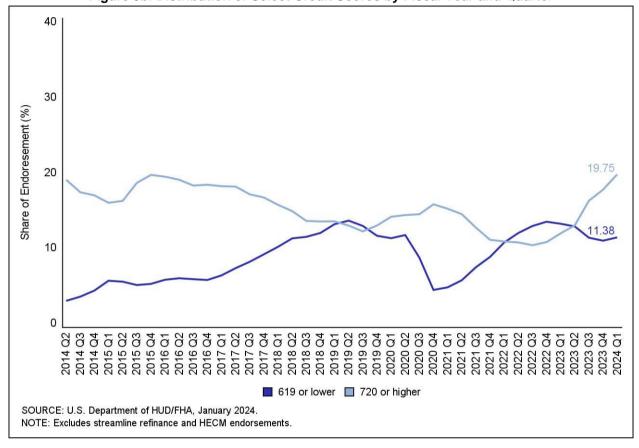

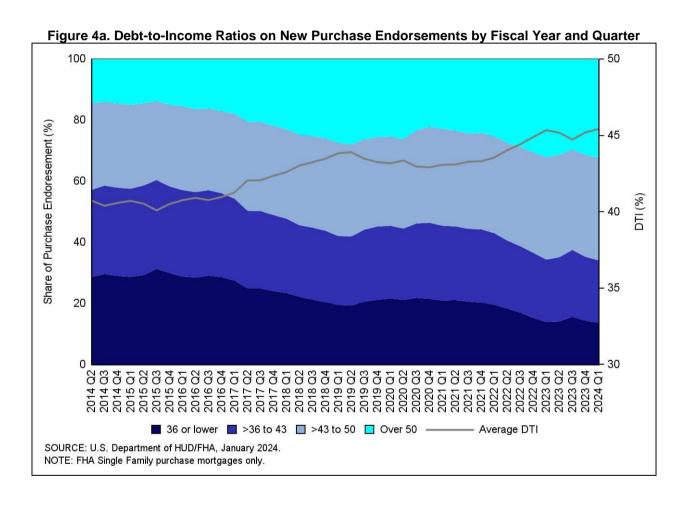

Figure 3b. Distribution of Select Credit Scores by Fiscal Year and Quarter

Debt-to-Income (DTI)

Approximately 32 percent of all FHA-insured forward purchase endorsements in the first quarter of FY 2024 had DTI ratios over 50 percent. This is up slightly from approximately 31 percent in the prior quarter, and nearly 7 percentage points higher than levels prior to the pandemic. The average DTI increased from 45.19 percent in the prior quarter to 45.41 percent this quarter. The DTI distribution and historical average DTI ratios are shown in Figure 4a below. In addition, Figure 4b reflects the mean DTI, mean payment-to-income (PTI) ratio, and spread between those two ratios for forward purchase endorsements. The decrease in the spread suggests that borrowers are spending a larger share of their incomes on housing expenses, likely due to rising home prices and elevated mortgage rates.

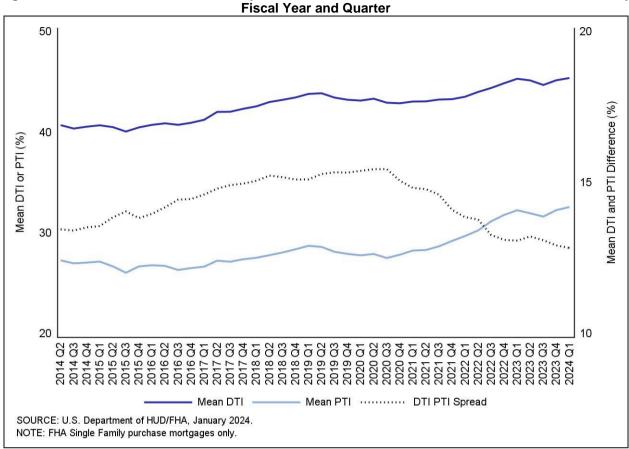

Figure 4b. Mean Debt-to-Income and Payment-to-Income Ratios on New Purchase Endorsements by

Average Loan-to-Value (LTV)

The average LTV ratio for purchase and refinance loans decreased from 89.70 percent in the prior quarter to 89.37 percent this quarter for all FHA forward mortgages combined (excluding streamline refinances). LTV ratios decreased across all endorsement types in the first quarter of fiscal year 2024. Typically, LTV ratios of refinance mortgages are lower than home purchase mortgages (Figure 5, Exhibit A-5, and Exhibit A-6).¹

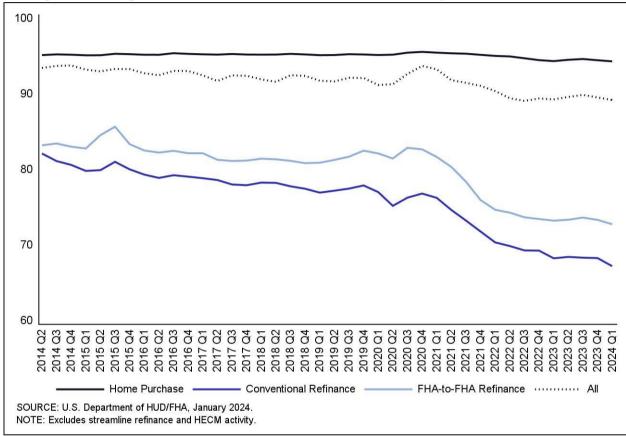

Figure 5. Average Loan-to-Value Ratios on New Endorsements by Fiscal Year and Quarter

¹ For a typical purchase mortgage endorsement, FHA charges an upfront mortgage insurance premium (UFMIP) of 1.75 percent of the loan balance. FHA permits borrowers to finance the UFMIP by having it added to the loan balance, and nearly all FHA borrowers do so. However, despite the increase in the loan balance, FHA reporting conventions have been, and remain, to report the LTV ratio on the loan balance without inclusion of the UFMIP. In the conventional market, custom would be to include a financed premium into the loan balance, and therefore the calculation of the LTV ratio. Additionally, in the conventional market for a low-down payment mortgage, an Interested Party Contribution (IPC) in excess of 3 percent of the value of the home is treated as a reduction in the value of the home, resulting in an increase in the reported LTV ratio of the transaction. For FHA-insured mortgages, no downward adjustment is made to the value of the property unless an IPC exceeds 6 percent of the value of the home.

Predicted and Actual Termination and Claim-Loss Rates

The predicted-versus-actual comparisons through the first quarter of FY 2024 are presented in Figure 6. Actual claims were below predicted levels due to prior policy decisions regarding eviction moratoria, forbearance, and loss mitigation options. Through the first quarter of FY 2024, the number of actual claims was 4,012, or 48.28 percent lower than the predicted 7,757. While there were significantly fewer claims than predicted, those loans that resulted in claims had typically been delinquent longer, had missed more payments, and were in worse condition at foreclosure, thus resulting in the actual loss rate being 3.97 percentage points higher than predicted.

Figure 6. Termination and Claim Loss Experience Compared to Forecasts

			Deviation1 (Actual	Percentage Deviation
As December 2023	Year to Date Predicted	Year to Date Actual	Minus Predicted)	(Actual Versus Predicted)
Prepayment Counts	163,260	103,801	-59,459	-36.42
Claim Counts ²	7,757	4,012	-3,745	-48.28
Claims (\$ millions)3	517	284	-233	-45.03
Net Loss on Claims	22.57	26.54	3.97	17.60

Note: Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report. Excludes HECM endorsements.

Deviations in this quarter's predicted versus actual prepayments, claims and loss rates have resulted from persistent and unexpected economic and policy conditions which were not in existence during the original modeled estimates. It is expected as budgetary and forecast models become more aligned with policy and economic

realities, deviations in predicted and actual values should tighten.

Projections of prepayment counts, claim counts, and claim dollars are modeled for the FY 2024 FHA financial statements. All projections shown here use quarterly

forecasts and thus reflect cyclical trends throughout the year.

3 Claim payments and counts reported here include those for conveyance (foreclosure) claims, pre-foreclosure (short) sales, and claims paid in connection with sales of delinquent mortgage. They do not include payments for loss mitigation mortgage, workout actions.

delinquent mortgages. They do not include payments for loss mitigation mortgage-workout actions.

⁴ These rates are losses as a percentage of the defaulted mortgage balance, for both conveyance and pre-foreclosure-sale claims. Includes only mortgages in the MMI Fund.

Budget Execution Credit Subsidy Rates

The budget execution subsidy rate for forward mortgages for FY 2024 is -1.32 percent. The subsidy rate for HECM mortgages is -2.87 percent for FY 2024 (Figure 7).

Figure 7. Budget Execution Credit Subsidy Rates (CSR), FY 2024 Q1

Type of Mortgage	Rate ¹ (%)
Forward Mortgages	-1.32
Reverse Mortgages (HECM)	-2.87

¹ Budget execution credit subsidy rates are the expected net present value, per dollar of new insurance endorsements, of all cash flows from insurance operations over the life of the mortgage insurance as of the year of the insurance commitments. A negative rate means that the present value of premium revenues is expected to be greater than the present value of net claim expenses over the life of the insurance, i.e., a negative subsidy. Mortgages with negative credit subsidies are expected to produce receipts for the federal budget. These initial budget-execution rates are those approved by the Office of Management and Budget for budget accounting. The rates are updated on an annual basis, once the insurance is in place, to reflect both actual experience and updated forecasts of future mortgage performance and insurance cash flows. For a historical breakdown of credit subsidy rates and re-estimates, see https://www.govinfo.gov/content/pkg/BUDGET-2024-BUD/pdf/BUDGET-2024-BUD.pdf SOURCE: U.S. Department of HUD/FHA, January 2024.

MMI Fund Cash and Investments

As Figure 8 shows, the total cash and investments of the MMI Fund decreased to \$142.75 billion in the first quarter of FY 2024, with \$9.38 billion held in the Financing account and \$133.37 billion held in the Capital Reserve account. MMI Fund Total Capital Resources are derived from netting other assets and liabilities from total cash and investments.

2024 Q1	133.37	9.38	142.75

NOTE: Only end-of-year balances represent audited figures.

¹ This is an on-budget account that records net receipts provided by FHA to the federal budget over time. Balances are held in cash and Treasury securities. The securities earn interest for FHA. Periods in which irregular changes to the balance are seen represent times when HUD transfers funds to/from the Financing account for the rebalancing required by annual budget re-estimates. The MMI Fund Cash and Investments includes a \$1.7 billion mandatory appropriation taken in FY 2013.

² This is a series of off-budget cash accounts used to manage insurance operation collections and disbursements.

³ Total is the sum of cash and investments in the Capital Reserve and Financing accounts. It excludes other assets and liabilities.

⁴ Capital Reserve Account and Financing Account may not always add to total because of rounding.

Cash Flows from Business Operations

The net operations cash flow increased from \$737 million in the prior quarter to \$1,044 million this quarter due to lower HECM and forward claim costs. Specifically, HECM Type-2 submissions continued to drop from the peak two quarters ago, as program change effects that sped up assignments in FY 2023 have declined. FHA proactively reduced average losses per claim through a more diversified asset disposition strategy, which includes promoting third-party sales at foreclosure auctions through its Claims Without Conveyance of Title (CWCOT) program and expanding the use of pre-foreclosure (short) sales and note sales. Overall, claim costs (measured by loss rate) have decreased from a high of 55 percent in 2014 to approximately 24 percent over the last four quarters (Exhibit A-7).

Figure 9. Business Operations Cash Flows, FY 2023 Q2 - FY 2024 Q1 (\$ millions)

SOURCE: U.S. Department of HUD/FHA, January 2024.

NOTE: Unaudited figures; details may not sum to total due to rounding. Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report.

¹ Note Sale Proceeds are the Cash Receipts from Note Sales.

² Note Collections, include Principal and Interest collections on HUD-held defaulted notes (Partial Claims)

³ Claims payments shown here include conveyance, pre-foreclosure sale, note sales, loss mitigation (home retention) actions, and all HECM claims (assignment and shortfall claims).

Early-Payment Default Rates

The overall Early-Payment Default (EPD) rate remained stable but still higher than the prepandemic levels. FHA saw a large jump in EPD rate at the beginning of the COVID-19 pandemic, which remained elevated through mid-2020. The EPD rate in the first quarter of FY 2024 was 1.66 percent, lower from the previous quarter's 1.76 percent. Specifically, the EPD rate for home purchases decreased from 1.91 percent to 1.80 percent, and such rate for refinances decreased from 1.16 percent to 1.05 percent.

SOURCE: U.S. Department of HUD/FHA, January 2024.

NOTE: EPD Rate is the percent of mortgages originated in each quarter for FHA insurance that experience a three-month delinquency in the first six payment cycles.

¹ Data for the first two months of the quarter only. There is a 7-month lag. Due to late reporting by a large servicer, the EPD rates in FY 2020 Q4 are likely understated.

Serious Delinquency Rates

The pandemic and its impact on the health and economic condition of citizens has been a major factor in the increase of FHA's serious delinquency (SDQ) rate in comparison to prepandemic levels. Starting in April 2020, a significant number of FHA borrowers requested approval to pause their monthly mortgage payments under the forbearance provisions of the CARES Act. As forbearance requests transitioned into payment delinquencies starting in the summer of 2020, the SDQ rate quickly rose from 4.04 percent in April 2020 to 11.90 percent in November 2020. However, the SDQ rate has since significantly improved and returned to the pre-pandemic level of 4.04 percent by the end of the first quarter of FY 2024 (Figure 11 and Exhibit A-12).

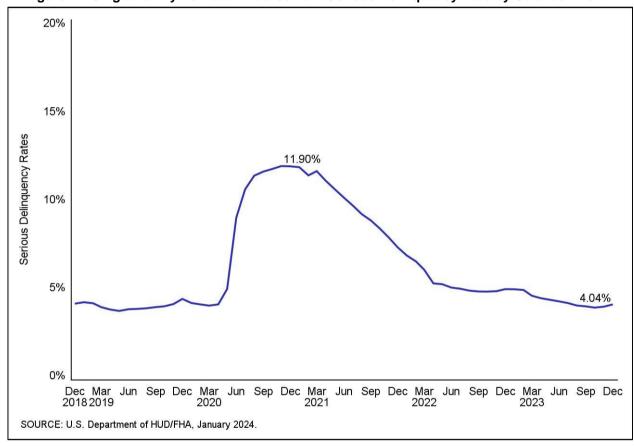

Figure 11. Single Family Forward Endorsement Serious Delinquency Rate by Calendar Month

Since the start of the pandemic, FHA has helped more than 2 million borrowers with FHA-insured mortgages through COVID-19 forbearance and COVID-19 loss mitigation home retention options. Approximately 2.4 million FHA borrowers entered into a forbearance or became seriously delinquent from April 1, 2020, through December 31, 2023. Among this population, as of the end of this quarter, over 1.2 million borrowers had entered, or were in the process of entering, a loss mitigation plan that would enable them to remain in their homes. Of those that had successfully entered a loss mitigation plan, the vast majority remained current or had paid off their mortgages by the end of this quarter, while approximately 265,000 had become delinquent again.

Of the 2.4 million FHA borrowers referenced above, 777,000 borrowers had cured or paid off their mortgages without need for a loss mitigation plan, and approximately 70,000 borrowers remained in forbearance. However, 273,000 borrowers, who had not sought assistance from servicers nor completed a loss mitigation home retention option, remained behind on their mortgage payments. It is this remaining population that FHA will continue to focus on reaching and assisting through loss-mitigation home retention options.

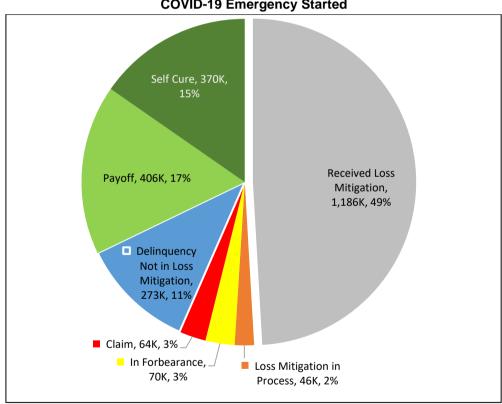

Figure 12. Status of Borrowers Who Received Forbearance or Were Seriously Delinquent Since the COVID-19 Emergency Started

SOURCE: U.S. Department of HUD/FHA, January 2024.

Note: Of the 1,186K mortgages entering loss mitigation, 700K are current, 220K paid off, and 265K re-defaulted. In addition, borrowers may move from one status category to another, thus the number of borrowers in any status category is likely to shift from quarter to quarter.

NOTE: Shares are based on loan counts. Excludes streamline refinances. Credit scores are cobranded between the three major credit repositories (Equifax, Experian, TransUnion) and Fair Isaac Corporation (FICO). Values can range from 300 to 850. FHA policy permits credit scores of 580 and above, except for loans with equity positions of 10 percent or more which may have credit scores as low as 500. Streamline refinance loans do not require full underwriting; therefore, they are not represented here.

NOTE: For Single Family forward loans only; Real Estate Owned (REO) refers to properties that HUD has assumed ownership of through the conveyance of title.

¹ First two months of the quarter only.

² REO alternatives comprise short sales, claims without conveyance of title (CWCOT), and note sales. Short sales refer to the sale of property where the defaulted borrower sells his/her home and uses the net sale proceeds to satisfy the mortgage debt even though the proceeds are less than the amount owed. In the FHA single family program, short sales are referred to as pre-foreclosure sales (PFS). CWCOT is a program approved under Section 426 of the Housing and Urban-Rural Recovery Act of 1983. It is designed to reduce the number of single-family mortgages owned by HUD by authorizing the payment of claims to mortgagees without conveying (transferring) the title of the property to HUD. Note Sale refers to the sale of defaulted mortgage notes. Note Sales are conducted through the Single-Family Asset Sales program.

SOURCE: U.S. Department of HUD/FHA, January 2024.

NOTE: Claims comprise of Foreclosure, Deed in Lieu of Foreclosure, and Mortgagor's Short Sale. The Claim Type 1 category represents the dollar volume of claims generated when the borrower no longer occupies the home, and the property is sold at a loss, with the mortgage never being assigned to the HUD Secretary. The Claim Type 2 category represents the dollar volume of claims resulting from the assignment of the mortgage to the HUD Secretary when the mortgage reaches 98 percent of the MCA. Supplemental claims are those claims submitted by lenders for other eligible expenses not included on original claims, such as property preservation expenses.

Details may not sum to total due to rounding.

SOURCE: U.S. Department of HUD/FHA, January 2024.

¹ Serious delinquency rates are the sum of 90-day delinquencies, plus in-foreclosures and in-bankruptcies.
Due to late reporting by a large servicer, the delinquency rates for February 2021 and February 2022 are likely understated.
