Quarterly Report to Congress on FHA Single-Family Mutual Mortgage Insurance Fund Programs

FY 2024 Q2 Data as of March 31, 2024

U.S. Department of Housing and Urban Development Federal Housing Administration

FOREWORD

On behalf of Secretary Marcia L. Fudge and Assistant Secretary for Housing Julia R. Gordon, and pursuant to requirements of Section 202(a)(5) of the National Housing Act as amended by the FHA Modernization Act of 2008 (Public Law 110-289, Page 122 Stat. 2834), I am herewith transmitting the Fiscal Year (FY) 2024 Second Quarter Report. This report covers mortgages that are obligations of the Mutual Mortgage Insurance (MMI) Fund of the Federal Housing Administration (FHA) for the reporting period from January 1, 2024 to March 31, 2024.

In the second quarter of FY 2024, FHA served 110,051 first-time homebuyers, representing 83 percent of FHA's forward purchase mortgage endorsements. FHA also served 42,219 households of color with purchase mortgages and 6,110 seniors were able to access their home equity using FHA's Home Equity Conversion Mortgage Program (HECM). For those homeowners who fell behind on their mortgage payments, FHA continued to deliver flexibilities and various loss mitigation options. The agency continues to engage with mortgage servicers, consumer advocates, and housing counselors to ensure that homeowners in need are aware of the loss mitigation tools available to them.

Despite a number of FHA borrowers continuing to face financial hardships in the second quarter of FY 2024, the percentage of seriously delinquent mortgages (those past due 90 or more days) have declined to the pre-pandemic levels, with the serious delinquency rate declining from 11.89 percent at the end of the first quarter of FY 2021 to 3.74 percent at the end of this quarter. In addition, early payment defaults (defaults within six months of endorsement) declined from a peak of nearly nine percent in early 2020 to 1.75 percent in the current quarter, though still above pre-pandemic levels. FHA will continue to focus extensive efforts on helping struggling homeowners to obtain financial relief needed to achieve long-term homeownership sustainability.

This quarterly report also provides detailed information on the composition and credit quality of new insurance in force, and on FHA's financial position as of March 31, 2024. In addition to this report to Congress, FHA provides information regarding the status of its Single-Family mortgage insurance portfolio via the publication of other complementary reports, including HUD's FY 2023 Annual Report to Congress on the Financial Status of the Mutual Mortgage Insurance Fund and the annual independent actuarial review of the MMI Fund, both published on November 15, 2023. All FHA reports can be found in the Office of Housing Reading Room.

The Department is pleased to provide details to members of Congress on how this report was prepared or to answer any questions about the information presented.

Sincerely,

Mia N. Pittman

Deputy Assistant Secretary Office of Risk Management and Regulatory Affairs

Mia N. Pittman

This report is in fulfillment of the requirement under section 2118 of the Housing and Economic Recovery Act of 2008 (12 USC 1708(a)(5)) that HUD report to the Congress on a quarterly basis respecting mortgages that are an obligation of the Mutual Mortgage Insurance Fund.

Endorsement Activity

During the second quarter of FY 2024, FHA endorsed 172,056 forward mortgages for insurance, a decrease of 5.97 percent from the prior quarter (Figure 1a). The dollar volume of all forward mortgage endorsements of \$51.69 billion decreased 3.35 percent from the prior quarter (Exhibit A-2). This change was largely due to seasonality as endorsement volume tends to be lower early in the calendar year. The dollar volume of purchase endorsements decreased by 6.47 percent (or \$2.90 billion) from the previous quarter, while refinance endorsement dollar volume of \$9.82 billion this quarter was up by \$1.11 billion (or 12.72 percent) from the prior quarter, as mortgage rates eased from their peak in the prior quarter.

FHA's purchase loan count was down by 8.12 percent from the previous quarter, from 145,058 to 133,284. Meanwhile, the FHA-to-FHA refinance endorsement count increased by 19.68 percent, from 15,876 to 19,000. The Conventional to FHA refinance endorsement count decreased 10.31 percent, from 22,044 to 19,772. Cash out refinance endorsements (limited to 80 percent loan to value), made up 82.37 percent of all refinance endorsements for this quarter, down from the prior quarter's 94.08 percent, as mortgage rates eased from the peak in the prior quarter.

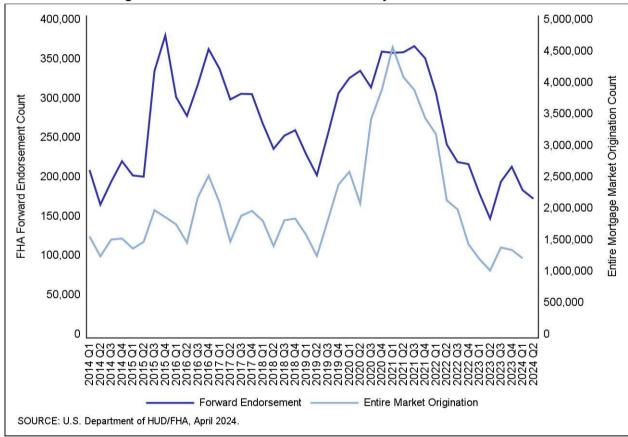

Figure 1a. Forward Endorsement Counts by Fiscal Year and Quarter

HECM endorsement volume was \$3.05 billion for the second quarter of FY 2024, a decrease of 12.34 percent from the previous quarter, also due primarily to seasonality. The HECM endorsement count was 6,110 this quarter, a decrease of 14.00 percent from the prior quarter. Figure 1b shows HECM endorsements relative to the Federal Housing Finance Agency (FHFA) Housing Price Index (HPI). In addition, the HECM refinance endorsement count declined from over 50 percent of all HECM endorsements in the first quarter of FY 2022 to 9 percent this quarter.

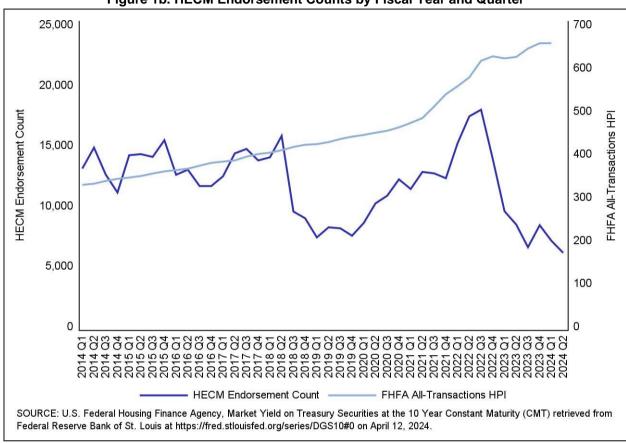

Figure 1b. HECM Endorsement Counts by Fiscal Year and Quarter

FHA Loan Credit Characteristics

The average credit score for forward mortgage endorsements (excluding streamline refinances) increased to 677 this quarter from 675 in the prior quarter, maintaining the upward trend since the fourth quarter of FY 2022. (Figure 2 and Exhibit A-4).

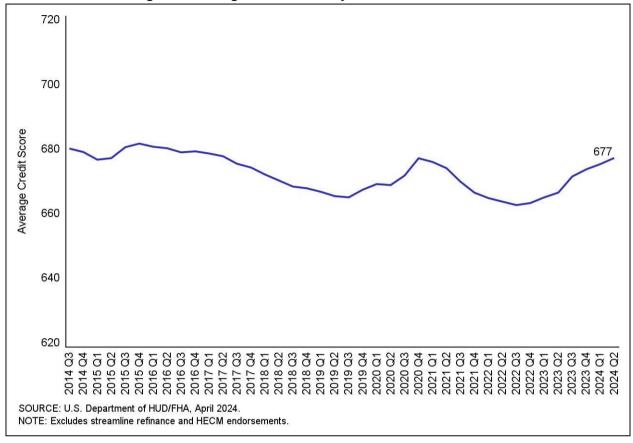

Figure 2. Average Credit Score by Fiscal Year and Quarter

As shown in Figure 3a, the distribution of credit scores for FHA forward endorsements has gradually shifted over the past few years. However, the core of the distribution continued to be in the 640–679 range (31.73 percent). In the second quarter of FY 2024, the share of 720+credit scores increased by 1.69 percentage points from the prior quarter to 21.44 percent (Figure 3a and Exhibit A-3).

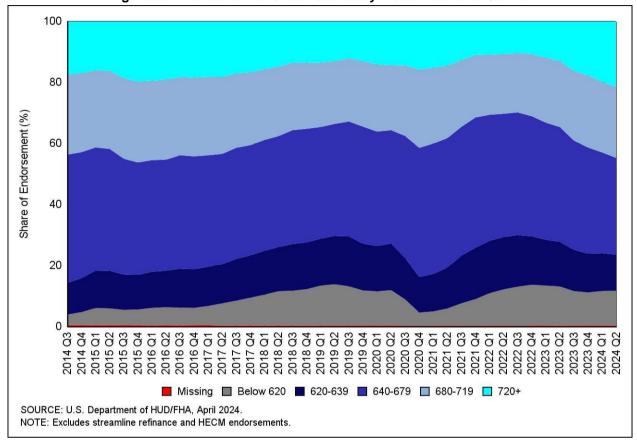

Figure 3a. Distribution of Credit Scores by Fiscal Year and Quarter

Figure 3b shows another perspective of the shift in FHA's credit profile, with loans endorsed with 720+ credit scores increasing to 21.44 percent in the second quarter of FY 2024 from 19.75 percent in the prior quarter. Loans endorsed with less than 620 credit scores rose from 11.38 percent in the prior quarter to 11.45 percent this quarter.

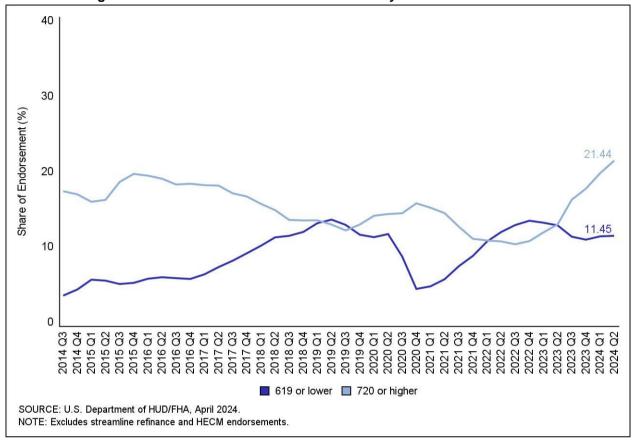

Figure 3b. Distribution of Select Credit Scores by Fiscal Year and Quarter

Debt-to-Income (DTI)

Approximately 31 percent of all FHA-insured forward purchase endorsements in the second quarter of FY 2024 had DTI ratios over 50 percent. This ratio is down slightly from approximately 32 percent in the prior quarter, and nearly 4 percentage points higher than levels prior to the pandemic. The average DTI decreased from 45.41 percent in the prior quarter to 45.06 percent this quarter. The DTI distribution and historical average DTI ratios are shown in Figure 4a below. In addition, Figure 4b reflects the mean DTI, mean payment-to-income (PTI) ratio, and spread between those two ratios for forward purchase endorsements. In this quarter, such spread increased slightly, reversing the downward trend in the prior three quarters. The increase in the spread suggests that borrowers may be spending a smaller share of their incomes on housing expenses, as mortgage rates have eased from their peak.

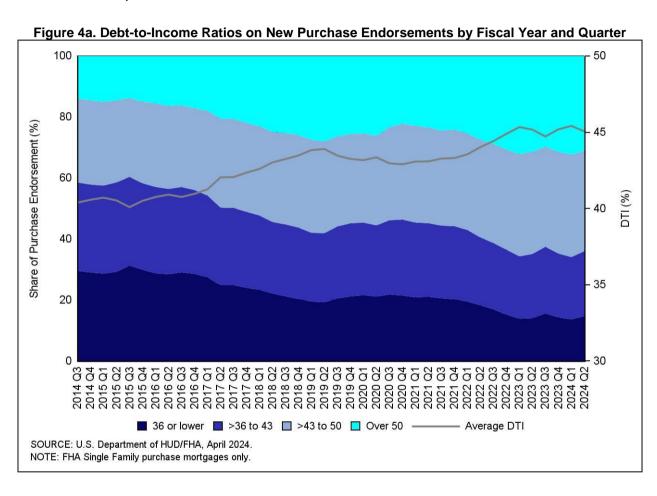

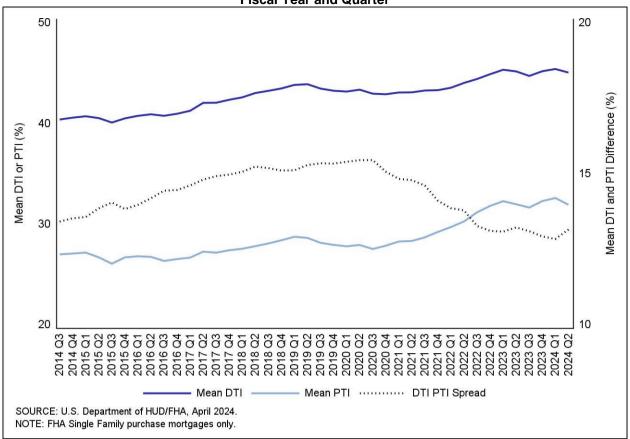

Figure 4b. Mean Debt-to-Income and Payment-to-Income Ratios on New Purchase Endorsements by Fiscal Year and Quarter

Average Loan-to-Value (LTV)

The average LTV ratio increased from 89.37 percent in the prior quarter to 89.70 percent in this quarter for all FHA Single-Family forward mortgages (excluding streamline refinances). The average LTV ratios increased across all endorsement types in the second quarter of fiscal year 2024. Typically, LTV ratios of refinance mortgages are lower than home purchase mortgages (Figure 5, Exhibit A-5, and Exhibit A-6).¹

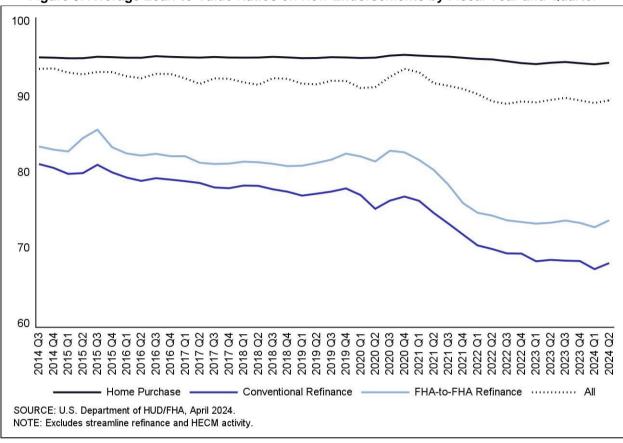

Figure 5. Average Loan-to-Value Ratios on New Endorsements by Fiscal Year and Quarter

⁻

¹ For a typical purchase mortgage endorsement, FHA charges an upfront mortgage insurance premium (UFMIP) of 1.75 percent of the loan balance. FHA permits borrowers to finance the UFMIP by having it added to the loan balance, and nearly all FHA borrowers do so. However, despite the increase in the loan balance, FHA reporting conventions have been, and remain, to report the LTV ratio on the loan balance without inclusion of the UFMIP. In the conventional market, custom would be to include a financed premium into the loan balance, and therefore the calculation of the LTV ratio. Additionally, in the conventional market for a low-down payment mortgage, an Interested Party Contribution (IPC) in excess of 3 percent of the value of the home is treated as a reduction in the value of the home, resulting in an increase in the reported LTV ratio of the transaction. For FHA-insured mortgages, no downward adjustment is made to the value of the property unless an IPC exceeds 6 percent of the value of the home.

Predicted and Actual Termination and Claim-Loss Rates

The predicted-versus-actual comparisons through the second quarter of FY 2024 are presented in Figure 6. Actual claims were below predicted levels due to prior policy decisions regarding eviction moratoria, forbearance, and loss mitigation options. Through the second quarter of FY 2024, the number of actual claims was 10,086, or 37.10 percent lower than the predicted 16,034. While there were significantly fewer claims than predicted, those loans that resulted in claims had typically been delinquent longer, had missed more payments, and were in worse condition at foreclosure, thus resulting in the actual loss rate being 1.61 percentage points higher than predicted.

Figure 6. Termination and Claim Loss Experience Compared to Forecasts

| As of March 2024 | Year to Date Predicted | Year to Date Actual | Deviation ¹ (Actual Minus Predicted) | Percentage Deviation (Actual Versus Predicted) |
|-------------------------------------|---------------------------|---------------------|---|--|
| Prepayment Counts | 322,104 | 200,519 | -121,585 | -37.75 |
| Claim Counts ² | 16,034 | 10,086 | -5,948 | -37.10 |
| Claims (\$ millions) ³ | 1,058 | 581 | -476 | -45.04 |
| Net Loss on Claims (%) ⁴ | 21.99 | 23.60 | 1.61 | 7.33 |

SOURCE: U.S. Department of HUD/FHA, April 2024.

Note: Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report. Excludes HECM

¹ Deviations in this quarter's predicted versus actual prepayments, claims and loss rates have resulted from persistent and unexpected economic and policy conditions which were not in existence during the original modeled estimates. It is expected as budgetary and forecast models become more aligned with policy and economic realities, deviations in predicted and actual values should tighten.

² Projections of prepayment counts, claim counts, and claim dollars are modeled for the FY 2024 FHA financial statements. All projections shown here use quarterly forecasts and thus reflect cyclical trends throughout the year.

³ Claim payments and counts reported here include those for conveyance (foreclosure) claims, pre-foreclosure (short) sales, and claims paid in connection with sales of delinquent mortgages. They do not include payments for loss mitigation mortgage-workout actions.

⁴ These rates are losses as a percentage of the defaulted mortgage balance, for both conveyance and pre-foreclosure-sale claims. Includes only mortgages in the MMI Fund.

Budget Execution Credit Subsidy Rates

For FY 2024, the budget execution subsidy rates for forward and HECM mortgages are -1.32 percent and -2.87 percent respectively (Figure 7).

Figure 7. Budget Execution Credit Subsidy Rates (CSR), FY 2024 Q2

| Type of Mortgage | Rate ¹ (%) |
|--------------------------|-----------------------|
| Forward Mortgages | -1.32 |
| Reverse Mortgages (HECM) | -2.87 |

¹ Budget execution credit subsidy rates are the expected net present value, per dollar of new insurance endorsements, of all cash flows from insurance operations over the life of the mortgage insurance as of the year of the insurance commitments. A negative rate means that the present value of premium revenues is expected to be greater than the present value of net claim expenses over the life of the insurance, i.e., a negative subsidy. Mortgages with negative credit subsidies are expected to produce receipts for the federal budget. These initial budget-execution rates are those approved by the Office of Management and Budget for budget accounting. The rates are updated on an annual basis, once the insurance is in place, to reflect both actual experience and updated forecasts of future mortgage performance and insurance cash flows. For a historical breakdown of credit subsidy rates and re-estimates, see https://www.govinfo.gov/content/pkg/BUDGET-2024-BUD/pdf/BUDGET-2024-BUD.pdf SOURCE: U.S. Department of HUD/FHA, April 2024.

MMI Fund Cash and Investments

As Figure 8 shows, the total cash and investments of the MMI Fund increased to \$146.19 billion in the second quarter of FY 2024, with \$9.63 billion held in the Financing account and \$136.56 billion held in the Capital Reserve account. MMI Fund Total Capital Resources are derived from netting other assets and liabilities from total cash and investments.

SOURCE: U.S. Department of HUD/FHA, April 2024.

NOTE: Only end-of-year balances represent audited figures.

¹ This is an on-budget account that records net receipts provided by FHA to the federal budget over time. Balances are held in cash and Treasury securities. The securities earn interest for FHA. Periods in which irregular changes to the balance are seen represent times when HUD transfers funds to/from the Financing account for the rebalancing required by annual budget re-estimates. The MMI Fund Cash and Investments includes a \$1.7 billion mandatory appropriation taken in FY 2013.

² This is a series of off-budget cash accounts used to manage insurance operation collections and disbursements.

³ Total is the sum of cash and investments in the Capital Reserve and Financing accounts. It excludes other assets and liabilities.

⁴ Capital Reserve Account and Financing Account may not always add to total because of rounding.

Cash Flows from Business Operations

The net operations cash flow decreased slightly from \$1,044 million in the prior quarter to \$1,023 million this quarter. Meanwhile, forward claims costs increased \$90 million, or 4.43 percent, from the prior quarter, while HECM claim costs decreased \$78 million, or 5.41 percent, from the prior quarter. Over the last decade, FHA has proactively reduced average losses per claim through a more diversified asset disposition strategy, which includes promoting third-party sales at foreclosure auctions through its Claims Without Conveyance of Title (CWCOT) program and expanding the use of pre-foreclosure (short) sales and note sales. Overall, claim costs (measured by loss rate) have decreased from a high of 55 percent in 2014 to approximately 24 percent over the last four quarters (Exhibit A-7).

SOURCE: U.S. Department of HUD/FHA, April 2024.

NOTE: Unaudited figures; details may not sum to total due to rounding. Due to differences in timing and data sources, the cash flow amounts may not reconcile fully with other tables in this report.

¹ Note Sale Proceeds are the Cash Receipts from Note Sales.

² Note Collections, include Principal and Interest collections on HUD-held defaulted notes (Partial Claims)

³ Claims payments shown here include conveyance, pre-foreclosure sale, note sales, loss mitigation (home retention) actions, and all HECM claims (assignment and shortfall claims)

Early-Payment Default Rates

The Early-Payment Default (EPD) rate remained relatively stable but still higher than the prepandemic levels. FHA saw a large jump in EPD rate at the beginning of the COVID-19 pandemic, which remained elevated through mid-2020. The EPD rate for loans originated in the fourth quarter of FY 2023 was 1.75 percent, slightly higher than the prior quarter's 1.72 percent. Specifically, the EPD rate for home purchases increased from 1.84 percent to 1.88 percent, and such rate for refinances increased from 1.19 percent to 1.26 percent.

SOURCE: U.S. Department of HUD/FHA, April 2024.

NOTE: EPD Rate is the percent of mortgages originated in each quarter for FHA insurance that experience a three-month delinquency in the first six payment cycles

¹ Data for the first two months of the quarter only. There is a 7-month lag. Due to late reporting by a large servicer, the EPD rates in FY 2020 Q4 are likely understated.

Serious Delinquency Rates

The pandemic and its impact on the health and economic condition of citizens was a major factor in the increase of FHA's serious delinquency (SDQ) rate from 2020 to 2022. Starting in April 2020, a significant number of FHA borrowers requested approval to pause their monthly mortgage payments under the forbearance provisions of the CARES Act. As forbearance requests transitioned into payment delinquencies starting in the summer of 2020, the SDQ rate quickly rose from 4.04 percent in April 2020 to 11.90 percent in November 2020. However, the SDQ rate has since significantly improved and returned largely to prepandemic levels by the end of the national emergency in May 2023. By the end of the second quarter of FY 2024, the SDQ rate was 3.74 percent, down from 4.04 percent as of the end of the prior quarter (Figure 11 and Exhibit A-12).

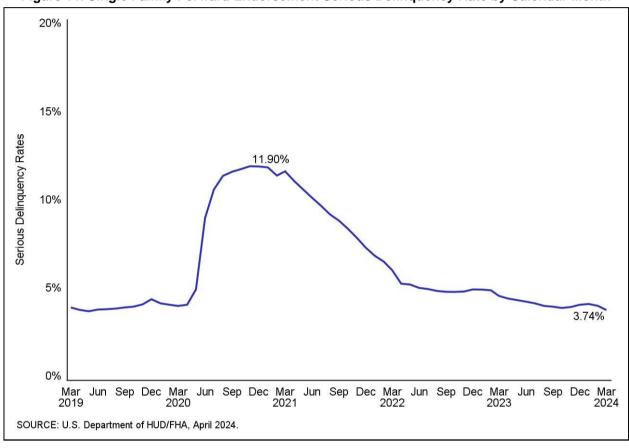

Figure 11. Single Family Forward Endorsement Serious Delinquency Rate by Calendar Month

Since the start of the pandemic, FHA has helped more than 2 million borrowers with FHA-insured mortgages through COVID-19 forbearance and loss mitigation home retention options. Approximately 2.5 million FHA borrowers entered into a forbearance or became seriously delinquent from April 1, 2020, through March 31, 2024. Among this population, as of the end of this quarter, approximately 1.3 million borrowers had entered, or were in the process of entering, a loss mitigation plan that would enable them to remain in their homes. Of those that had successfully entered a loss mitigation plan, the vast majority remained current or had paid off their mortgages by the end of this quarter, while approximately 239,000 had become delinquent again.

Of the 2.5 million FHA borrowers referenced above, 820,000 borrowers had cured or paid off their mortgages without need for a loss mitigation plan, and approximately 78,000 borrowers remained in forbearance. However, 248,000 borrowers, who had not sought assistance from servicers nor completed a loss mitigation home retention option, remained behind on their mortgage payments. It is this remaining population that FHA will continue to focus on reaching and assisting through loss-mitigation home retention options.

SOURCE: U.S. Department of HUD/FHA, April 2024.

Note: Of the 1,228K mortgages entering loss mitigation, 758K are current, 231K paid off, and 239K re-defaulted. In addition, borrowers may move from one status category to another, thus the number of borrowers in any status category is likely to shift from quarter to quarter.

2 The FHA reverse-mortgage insurance program is called Home Equity Conversion Mortgage (HECM). Starting in FY 2009 (2008 Q4), all new HECM endorsements are now in the Mutual Mortgage Insurance Fund. Previous endorsements, by law, remain in the General and Special Risk Insurance Fund.

SOURCE: U.S. Department of HUD/FHA, April 2024.

NOTE: Shares are based on loan counts. Excludes streamline refinances. Credit scores are cobranded between the three major credit repositories (Equifax, Experian, TransUnion) and Fair Isaac Corporation (FICO). Values can range from 300 to 850. FHA policy permits credit scores of 580 and above, except for loans with equity positions of 10 percent or more which may have credit scores as low as 500. Streamline refinance loans do not require full underwriting; therefore, they are not represented here.

NOTE: For Single Family forward loans only; Real Estate Owned (REO) refers to properties that HUD has assumed ownership of through the conveyance of title.

¹ First two months of the quarter only.

² REO alternatives comprise short sales, claims without conveyance of title (CWCOT), and note sales. Short sales refer to the sale of property where the defaulted borrower sells his/her home and uses the net sale proceeds to satisfy the mortgage debt even though the proceeds are less than the amount owed. In the FHA single family program, short sales are referred to as pre-foreclosure sales (PFS). CWCOT is a program approved under Section 426 of the Housing and Urban-Rural Recovery Act of 1983. It is designed to reduce the number of single-family mortgages owned by HUD by authorizing the payment of claims to mortgagees without conveying (transferring) the title of the property to HUD. Note Sale refers to the sale of defaulted mortgage notes. Note Sales are conducted through the Single-Family Asset Sales program.

NOTE: Claims comprise of Foreclosure, Deed in Lieu of Foreclosure, and Mortgagor's Short Sale. The Claim Type 1 category represents the dollar volume of claims generated when the borrower no longer occupies the home, and the property is sold at a loss, with the mortgage never being assigned to the HUD Secretary. The Claim Type 2 category represents the dollar volume of claims resulting from the assignment of the mortgage to the HUD Secretary when the mortgage reaches 98 percent of the MCA. Supplemental claims are those claims submitted by lenders for other eligible expenses not included on original claims, such as property preservation

¹ Details may not sum to total due to rounding.
